

A Winter Gift

- Decide on the way you are going to decorate the cube. and colour it first before you cut it out
- carefully cut out the outline of the shape
- carefully fold on **all** the lines (it's important it is actually **on** the lines use a ruler to help you fold if needed)
- put a layer of glue on the flaps marked '1' stick them one flap at a time making sure you hold them down until they are stuck.
- then add a layer of glue to the flaps marked 2 and carefully tuck them in and stick them. this is very tricky so be patient!
- a very small bit of sticky tape will help at this point - but don't use too much it looks messy!
