

# Countdown to Christmas

## Spiral Christmas Tree Ornament

Start off by drawing a spiral shape on a piece of green card. You will need to make quite a few turns around. Don't make the gaps between the lines too fat. I would decorate it before you cut the spiral.

You can use anything to decorate it, even colouring in with felt pens. I used sticky backed sparkly foam. To get small enough 'dots' of foam I used a hole punch to cut the circles. When decorated carefully cut it out to make the spiral.

To finish it off thread some cotton through the top. A little tip to help punch a hole safely is to use a bit of blutack or similar behind the area where the hole is to go, and use a sharp pencil to puncture.

You might want to add a star to the finished piece.
